\* Required: broadband Internet connection, router and active power sockets within one property.

*devolo*

# Highlights:

- The best home network connection, thanks to Powerline Technology. WiFi from any electrical socket. Simply unpack it, plug it in and get started.
- Finally WiFi at ac speeds: Up to 1200 Mbps for smartphones, tablets, laptops and other devices.
- Four integrated antennas ensure outstanding WiFi ac reception.
- Simultaneous use of 2.4 and 5 GHz WiFi frequencies for maximum WiFi speed.
- Powerline connection over the electrical wiring at speeds up to 1200 Mbps.
- For the first time, devolo range+ Technology is taking advantage of all three wires in the electric mains circuit at the same time for even more performance and longer range.
- Featuring two integrated Gigabit LAN ports for your Internet-compatible devices (Smart TV, game console, computer, etc.).
- The integrated electrical socket ensures that no power socket in the room is wasted.
- WiFi Move Technology automatically connects multiple adapters to a single WiFi network. Optimal WiFi reception throughout your home—entirely automated.
- Integrated encryption at the push of a button! 128-bit AES for the Powerline connection and WPA2 for WiFi ac.
- It works throughout your home thanks to automatic phase shift.
- The intuitive devolo app helps you perfectly manage your personal home network to meet all your needs (e.g. child-safety features, guest accounts, WiFi time control).
- Compatible with all adapters of the 200/500/650/1200 product series.
- Rely on number 1: More than 20 million devolo dLAN® adapters have been sold worldwide.
- Complete 3-year warranty.

For the first time, devolo range+ Technology is taking advantage of all three wires in the electric mains circuit at the same time for even more performance and longer range.

WiFi Move Technology automatically connects multiple adapters to a single WiFi network. Optimal WiFi reception throughout your home—entirely automated.
